

## **Walking Bus assembly**

Hi, we're here to talk to you about **starting a walking bus at our school.**

We want as many people as possible to travel to school without using a car if possible.

That means you can walk, cycle, scoot or get public transport, like a bus or the tube.

One way to travel to school is by joining us on our **school walking bus.**

**What is a walking bus? Let us give a short demonstration on how it works.**

(People to act it out, while others speak)

A walking bus works exactly like how a bus works, except we walk! It is a friendly, fun, and safe way to walk to school.

I would have to find out who lives near me, and on my way to school, I would 'pick up' other students who live on my journey/route.

I would plan to meet them at certain places, and then we would walk together on our journey to school.

We would be walking with parents as well, not just by ourselves.

On our route, we would try to walk on side streets and avoid main roads where air pollution is higher.

So who thinks they would like to join a walking bus?

Let your parents or guardians know!
